Tracking the HIV epidemic and response

Eleanor Gouws

GLOBAL AIDS STRATEGY 2021-2026 **END INEQUALITIES. END AIDS.**

ENDING INEQUALITIES AND GETTING ON TRACK TO END AIDS BY 2030

A summary of the commitments and targets within the United Nations General Assembly's 2021 Political Declaration on HIV and AIDS

Ending inequalities and getting on track to end AIDS by 2030 — A summary of the commitments and targets within the United Nations General Assembly's 2021 Political Declaration on HIV and AIDS (unaids.org)

The 2025 Targets

IMPACT GOALS

Reduce annual new HIV infections

Reduce annual new AIDS-related deaths

to under 370 000 to under 250 000

Fully resourcing and sustaining efficient and integrated HIV responses

Access to HIV services and solutions

95% of people at risk of HIV infection have access to and use appropriate, prioritized, person-centred and effective combination prevention options

95% of women of reproductive age have their HIV and sexual and reproductive health service needs met

95% of pregnant and breastfeeding women living with HIV have suppressed viral loads

95% of HIV-exposed children are tested by two months of age and again after cessation of breastfeeding

75% of all children living with HIV have suppressed viral loads by 2023 (interim target)

95–95-95 testing and treatment targets are achieved within all subpopulations, age groups and geographic settings, including children living with HIV

90% of people living with HIV receive preventive treatment for tuberculosis

Breaking down barriers

Less than 10% of countries have punitive legal and policy environments that lead to the denial or limitation of access to services

Less than 10% of people living with HIV and key populations experience stigma and discrimination

Less than 10% of women, girls, people living with HIV and key populations experience gender-based inequalities and all forms of gender-based violence

30% of testing and treatment services to be delivered by community-led organizations

80% of service delivery for HIV prevention programmes for key populations and women to be delivered by community-, key population- and women-led organizations

60% of the programmes support the achievement of societal enablers to be delivered by community-led organizations

Increase HIV investments in low- and middle-income countries to **US\$ 29 billion** per year by 2025

90% of people living with HIV and people at risk are linked to people-centred and context-specific integrated services for other communicable diseases, noncommunicable diseases, sexual health and genderbased violence, mental health, drug and substance use, and other services they need for their overall health and well-being

45% of people living with, at risk of and affected by HIV and AIDS have access to one or more social protection benefits

95% of people within humanitarian settings at risk of HIV use appropriate, prioritized, people-centred and effective combination prevention options

90% of people in humanitarian settings have access to integrated tuberculosis, hepatitis C and HIV services, in addition to programmes to address genderbased violence (including intimate partner violence). This includes PEP, emergency contraception and psychological first aid

95% of people living with, at risk of and affected by HIV are better protected against health emergencies and pandemics, including COVID-19
